Planned Power Outage Notification

Work Order # 101081164
Date: Sunday, January 11, 2015
Estimated outage duration: 10
To occur between: 8 a.m. - 6 p.m.

DATE

If your planned power outage changes we will call the phone number on your account.

WHY ARE WE TURNING OFF YOUR POWER?

We need to make some improvements to the power system in your neighborhood. Most of the time, we can do this with no impact to you. Sometimes, we need to shut off your power so our crews can work safely. We know being without power is inconvenient. We are committed to keeping you and our employees safe. We'll turn the lights back on as soon as we can!

WHAT YOU CAN DO:

- **If you rely on medical equipment dependent on electricity,** have a plan to maintain use of your equipment during the outage.
- **Charge cell phones.**
- **Unplug computers, televisions and sensitive electronics.**
- **Notify your home security company.**
- **Know how to manually operate garage doors and electric gates.**
- **Minimize opening refrigerator and freezer doors during the outage.**
- **If you have a generator, make sure it has been installed properly.** Refer to the manufacturer's instructions for safe generator use.
