SUBJECT: King County Flood District Flood Reduction Fund Application for Financial assistance to Perform Video Inspection, Cleaning and Repair of Stormwater Drainage Infrastructure

ATTACHMENTS: Resolution 2015-257
King County Flood District Flood Reduction Fund Application

Previous Council Review Date: N/A

Summary: The City of Pacific has requested \$20,000 to perform video inspection, cleaning and repair of stormwater drainage infrastructure upstream of the City Park between Alder Lane South and Pacific Avenue along 3rd Avenue SE. This effort will ensure the operational functionality of this stormwater drainage segment and help reduce the flooding potential near the City Park during heavy rain events and high river flows. The King County Flood District Flood Reduction Fund is a potential source of funds to pay for this work.

Recommendation/Action: Staff recommends Council approve Resolution No. 2015-257.

Motion for Consideration: Move to approve Resolution No. 2015-257, A RESOLUTION AUTHORIZING APPLICATION FOR KING COUNTY FLOOD DISTRICT FLOOD REDUCTION FUND FOR FINANCIAL ASSISTANCE TO VIDEO INSPECT, CLEAN AND REPAIR STORMDRAINAGE INFRASTRUCTURE FROM ALDER LANE TO PACIFIC AVENUE ALONG 3RD AVENUE SE.

Budget Impact: There is no immediate budget impact associated with the passage of this measure.

Alternatives: Deny the measure and find alternative funding source to pay to for this work.

THE KING COUNTY FLOOD DISTRICT

FLOOD REDUCTION FUND

2015 APPLICATION FORM

Fund eligibility and requirements

The Flood Reduction Fund targets medium and small local flood reduction projects including projects where the control of stormwater will have a direct benefit in reducing flooding.

- There is no cap on the award amount, except up to the annual amount allocated to the Flood Reduction Fund of \$2.88 million.
- Matching funds are encouraged but **not** required.
- The expenditure of funds must be completed no later than 36 months after receiving funds.
- An annual status report and final project completion report are required.

Eligible applicants

Homeowner associations; private non-profit organizations or associations; schools; special districts; Tribes; and King County jurisdictions. **Not eligible:** private individuals, businesses, and consultants.

Eligible projects

1. The proposal is consistent with the evaluation criteria and provides a flood reduction benefit such as, but not limited to:
 - Surface water overflows.
 - Near-shore flooding.
 - Lake flooding due to outflow blockage.
 - Clearance of clogged agricultural drainage systems.
 - Slope stabilization when slope failure is caused by the design inadequacy or failure of a stormwater system.
 - Assessment of existing conditions as part of the creation of a lake management district.
2. The proposal provides a broad economic benefit, such as:
 - Maintaining access to goods and infrastructure that serve a larger agricultural economy.
 - Providing navigable water channels for industry and recreation.
3. The project is reasonable based on the following criteria:
 - Project purpose and goals are consistent with this grant program.
 - Implementation of the project is realistic and well-thought out.
 - The budget is feasible for the kind of activity proposed, is sufficiently detailed, and leverages other resources.
 - Partners and stakeholders are engaged in several phases of this project.
 - The project team is qualified to carry out the project.
 - The project legacy, through oversight or continuous improvements, is assured.
 - Readiness to proceed is assured (e.g., design is finalized and permits are secured or are being expedited as an incentive to start the project).

Ineligible projects

The following types of projects will not be considered for funding:

- Projects that are already eligible for funding under Watershed Resource Inventory Area (WRIA) programs, such as:
 - Habitat improvement projects where flood hazard reduction is not the primary purpose.

- Salmon habitat enhancement projects.
- Projects whose design and/or performance may transfer flooding problems upstream or downstream.
- Projects that do not compensate for the loss of restored or undisturbed natural habitat or may adversely impact habitat or water quality.
- Projects that do not include on-the-ground structural improvements as a deliverable, except for the assessment of existing conditions related to the creation of lake management districts.
- Projects included on the King County Flood Control District 6-year Capital Improvement Project list.

Supplemental items for consideration The project selection team will evaluate whether or not a proposed project provides any of these additional optional items:

- Project results in multiple benefits, such as:
 - Demonstrable water quality improvement to a listed body of water.
 - Recreational access.
 - Ecosystem protections and improvements not limited to salmon.
 - Safeguarding critical facilities.
 - Improved access to maintain the economic viability of a community, including water access.
 - Channel migration zone protection.
- Project leverages state, federal and local programs and funding directed towards floodplain management efforts.
- Project provides matching funds (not required).

PROJECT NARRATIVE

NOTE: It is best to answer and edit the questions in a separate document and submit as an attachment then paste them in the shaded areas below.

PROJECT BACKGROUND (NOT RATED)

Briefly explain IN ONE PAGE the history of the problem you are addressing in this project. How has the problem been addressed to date and by whom?

Cut and paste your narrative below

The City Park is part of the King County Levee system and receives stormwater from throughout the City of Pacific. The City of Pacific has limited budget to address all stormwater drainage conveyance needs. Ensuring the operational functionality stormwater drainage upstream of the City Park will help prevent surcharging of the City’s stormdrainage system upstream of the City Park during heavy rains and river flow events.

EVALUATED QUESTIONS

QUESTION #1 – PROJECT PURPOSE, GOALS, OBJECTIVES, OUTPUTS AND OUTCOMES

- A. Describe what you plan to do and how it will specifically and measurably alleviate a significant local flooding problem AND provide a broad economic benefit, such as but not limited to: (a) maintaining access to goods and infrastructure that serve a larger agricultural economy or (b) improve or maintain navigable water channels for industry and recreation.

Cut and paste your narrative below

The proposed use of the funds is to perform video inspect, clean and repair of stormwater drainage infrastructure upstream of the City Park to ensure its carrying capacity is at design capacity.

- B. Describe the project objectives and the outputs that will carry them out. Include community awareness, community participation objectives and their outputs if any.

Cut and paste your narrative below

The primary objective is to ensure that the upstream stormwater conveyance flowing stormwater into the City Park and levee holding area is operating at 100% design capacity. This will help prevent surcharging of the storm drainage system upstream of the City Park during high rain and river flow events.

- C. Describe 1) The tangible near term-outcomes of your project, 2) how you will measure their attainment and 3) describe the long-term outcomes

Cut and paste your narrative below

The short term goal is to prevent upstream stormwater surcharging and flooding. The long term goal is to work to establish stormwater rates structures that allow the City of Pacific to fully fund these type of projects locally.

QUESTION #2 – IMPLEMENTATION

Please complete the scope of work for your project. Ensure that there is a clear path between the activities and the products or deliverables.

TASKS	ACTIVITIES AND DELIVERABLES	TOTAL SHARE OF AWARD FUNDS	DATES When is the task starting and ending?
EXAMPLE: SUB-TASK 1: Plant riparian vegetation	Please address the who, what where, when, why, how, how many, how much as appropriate and in the most logical order. Here is an example: WHO 10 volunteers WHAT will help create a riparian buffer WHY to shade Happy Creek HOW by planting HOW MUCH/HOW MANY 387 trees and shrubs along 500 ft of stream bank WHERE south of the Valley Road.	FOR EXAMPLE: \$2,345	WHEN March 2006
Task 1	The City will retain the services of a qualified firm to perform video inspections and cleaning of this stormwater segment.	\$5,000	Septemeber 2015
Task 2	The City will retain the services of a qualified firm to perform repair of failed segments of this stormwater segment.	\$15,000	April 2016
Add more tasks below if necessary			
Permits/ permission (if applicable)	State all required project permits and authorizations (including right-of-way access) as follows: Name of permit, issuer, recipient, purpose and inclusive dates. If no permits or authorizations are required, state that none required.		N/A
Credits	As part of your project deliverables, provide a plan of how, where and when this grant will be acknowledged as funded by the King County Flood Control District.		
TASK 5 Final report	Submit a final report and the financial closeout documentation no later that 30 days after the end date of the project.		June 15, 2016

QUESTION #3 – PARTNERS AND STAKEHOLDERS Identify who this project engages, how they will participate and what they will contribute during the various phases of planning and implementation or as a result of this project.

Cut and paste your narrative below

This project will be coordinated with our partner the King County Flood Control District. The stakeholders are the citizens of the region: Algona, Auburn, Pacific, Sumner and parts of unincorporated King and Pierce Counties.

QUESTION #4 – PROJECT TEAM

Describe the project team’s roles and qualifications (including consultants and committed partners) in carrying out this project.

Cut and paste your narrative below

The team consists of City staff and elected officials as well as County staff and elected officials. There has been numerous years of a successful partnership to protect the stakeholders from flooding.

QUESTION #5 – LEGACY Describe how the project will be maintained and/or if there is clear evidence that the planning of future phases of this project or of associated projects is well underway.

Cut and paste your narrative below

The City and King County Flood Control District will benefit from confirming infrastructure condition information that can be incorporated into the future and final design of the right bank levee improvement project.

QUESTION #6 – BUDGET

Please complete the budget spreadsheet below.

BUDGET ITEM	TOTAL	GRANT AWARD SHARE	FINANCIAL MATCH (not required)			MATCH TOTAL
			SOURCE	SOURCE	SOURCE	
			City Staff			
AMOUNT						
STAFFING						
PROJECT SUPPLIES						
COMMERCIAL SERVICES AND CREW TIME	\$20,000	\$20,000

QUESTION #7 – READINESS TO PROCEED

Describe what is in place and what is missing – other than being awarded this grant – before you can begin your project. Estimate dates when you plan to have the missing elements in place.

Cut and paste your narrative below

After grant award the City will need to select qualified firms to perform the work. For the 2015 portion of the work it is estimated that qualified firms can be selected in August and for the 2016 component March 2016.

QUESTION #8 – SUPPLEMENTAL CONSIDERATION

Supplemental consideration will be given if the applicant answers the following question:

Describe or summarize other benefits achieved by this project. Be specific in explaining how the project achieves these benefits and how it is crucial to achieving them.

- Project achieves multiple non-flood related benefits.

- Project stimulates the coordination and leveraging of state, federal and local programs and funding directed towards floodplain efforts.
- Project incorporates other floodplain management objectives.
- Project leverages other programs such as volunteer stewardship programs or partners' in-kind contributions (note that financial leverage, if any, should be addressed in Question #6) .

Cut and paste your narrative below

This project will help inform the right bank levee design team with infrastructure information that will assist in developing stormwater conveyance connections to, through and along 3rd Avenue SE.

OPTIONAL

You are strongly encouraged to include one or more of the following items as an attachment or links to a web page.

- Organization's brochure.
- Selected project accomplishments.

Attachments will be read at the reviewer's discretion. You are strongly recommended to limit your attachments or web page links to an absolute minimum.
