Re: Stormwater Citizen Advisory Committee (SWCAC)

The City of Pacific is seeking stakeholders to participate in a Stormwater Citizen Advisory Committee (SWCAC). The SWCAC is made up of one City Councilmember from the Public Works committee, the Public Works Manager, one additional Public Works employee, and three to five stakeholders of the City.

The function of the Committee is to assist in the development of the Stormwater Capital Improvement Plan and provide input on stormwater rate structuring. The Committee's functions include the following:

- Advise the City on stormwater/drainage system issues, policies, standards, plans, and capital programs;
- Guide stormwater/drainage system planning work and public involvement in stormwater/drainage system programs; and
- Set goals for the stormwater/drainage system and special stormwater/drainage system studies.

Meetings will be scheduled to occur once every three or four months with an additional meeting in January or February to review and finalize the annual stormwater report. However, there may be a few extra meetings at the offset to help people get started on the process.

The Stakeholders shall be property owners that are residents or business owners. Candidates will be selected based on ensuring that it is representative of a diversity of community members that includes neighborhood, technical, and business perspectives. The Mayor or City Administrator will select and appoint a small number of candidates based on a combination of the following qualifications:

- Knowledge of transportation issues;
- Familiarity with City transportation system;
- An interest in the public policy issues affecting government activities.
- Ability to represent Pacific neighborhoods and/or business perspectives.

If interested, please contact Councilperson Vic Kave at vkave@ci.pacific.wa.us .
